ADVANTAGES OF SAN AGROW PRODUCTS

- Sustainable biotechnological solutions for plant protection and nutrition to support customer needs.
- Highly targeted, effective and no residues.
- High quality efficacious products and excellent customer support for sustainable growth and effective soil and plant protection.

HERBICIDES

SUPPRESS®

FAST AND EFFECTIVE WEED CONTROL

A broad spectrum contact herbicide for post-emergent, non-selective weed control for use in and around all agricultural food and non-food crops. The proprietary formulation is a non-volatile, emulsifiable concentrate that provides rapid, effective weed control. Excellent tool for preventing weed resistance by rotating with conventional herbicides.

✓ OMRI ✓ WSDA

PLANT NUTRITION

TRIGRR®

OPTIMIZE YOUR CROP

Is formulated with extracts from plant, fermentation and seaweed origin for synergistic biostimulant effect on plants. Improve nutrient and water uptake, crop quality, yield, and overall plant vigor as well as plant nutritional balance.

✓ CDFA ✓ WSDA

ADJUVANTS

XENA®

MAXIMIZE PRODUCT APPLICATIONS

An effective adjuvant that increases the spreading and adhesion of insecticides, fungicides, herbicides, biostimulants, plant growth regulators and biopesticides. An excellent tank-mix partner to improve the coverage and retention of agricultural sprays on the plant surface.

BUFFER PROTECT NT™

Optimize efficacy of Blossom Protect™ against fire blight. Specifically designed buffer to optimize the efficacy of Blossom Protect™ against fire blight in pome fruits.

✓ OMRI ✓ WSDA

PLANT PROTECTION

BOTECTOR®

LEAVE NO SPACE FOR BOTRYTIS AND MORE

Highly effective preventive biofungicide used in the control of post harvest diseases; botrytis in grapes and vegetables; anthracnose, botrytis, phomopsis and rhizopus in berries; and blossom blight and brown rot in almonds and stone fruits. Botector works through natural competition to inhibit the pathogens from colonizing infection sites on the plant surface and fruits.

- Biodynamic**
- WSDA

BLOSSOM PROTECT™

PROTECT BLOSSOMS, SAFEGUARD FRUITS

An effective preventive biofungicide and biobactericide used to fight fire blight and storage diseases in pome fruits; and walnut blight. Blossom Protect contains highly competitive microorganisms which work through natural competition to block infection sites and prevent disease.

- Organic agriculture*
- Biodynamic**
- WSDA

DART®

EFFECTIVE BROAD SPECTRUM DISEASE CONTROL

A broad spectrum contact fungicide for use on a variety of fruit and vegetable crops to suppress and control disease. It is an emulsifiable concentrate that controls diseases such as powdery mildew, downy mildew, *Botryosphaeria*, *Alternaria*, mummy berry, *Phomopsis*, anthracnose, and apple and pear scab.

- WSDA

GARGOIL®

INSECT, MITE AND DISEASE CONTROL

An effective broad-spectrum plant-based insecticide for all agricultural crops and ornamentals. Targets mites and soft-body insect pests, including leafhoppers, aphids, thrips, whiteflies, psyllids and others.

- OMRI
- WSDA

The Grower's Advantage® Since 1982

FOR ORGANIC PRODUCTION

* Certified for use in organic agriculture compliant with Regulation (EU) 2018/848
