

DURALEV™

ELEVATES YOUR CROPS' DEFENSES

SEAMLESS COMPATIBILITY. RESIDUE-FREE CONFIDENCE.

TRAIN. PROTECT. PERFORM!

DURALEV trains your crops to defend themselves.

Its active ingredient—Cerevisane®—mimics a pathogen attack to activate the **plant's natural immune system** (Systemic Resistance Inducer).

This false alarm primes your **specialty crops**, making them ready to defend against a **wide range of diseases** the moment they strike.

ORGANIC & RESIDUE-FREE

OMRI-listed protection against a **wide range of diseases** with **zero harmful residues** or environmental impact.

EASY TO USE

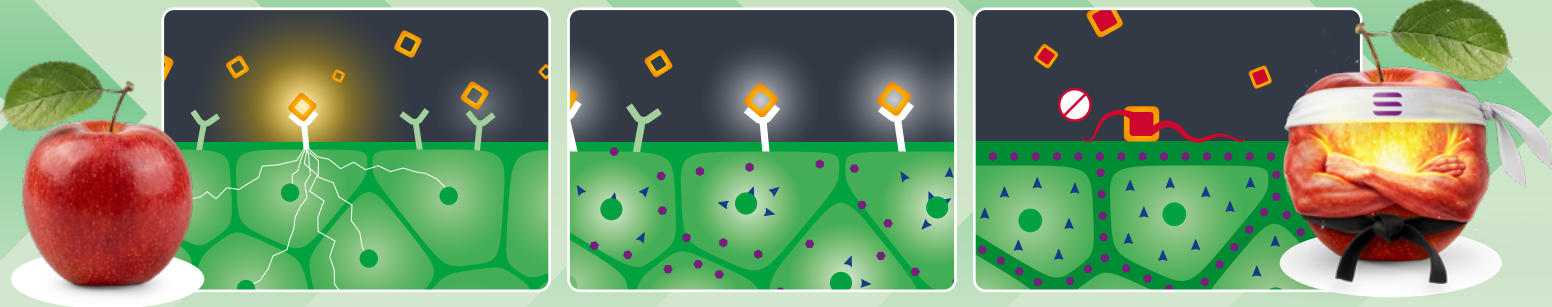

Compatible with most commonly used products due to its non-living active ingredient. **Easily stored** 2+ years at room temperature.

FITS YOUR PLAN

For **conventional and organic** systems, ideal in rotational programs. A **0-day PHI** and **no MRL** ensures flexible harvest times.

HOW DURALEV TRAINS YOUR CROP

Harmless **◇ Cerevisane** mimics common pathogens. The **Y receptors** detect them and alert the **● cell nuclei** to prepare the defenses.

They trigger the production of **▲ defense enzymes** (PR-proteins) and **● cell wall reinforcers** (phenolic compounds).

● Stronger cell walls block real **◇ pathogens** from entering, while **▲ defense enzymes** attack any intruders—maximizing **yield & quality**.

PRODUCT SPECIFICATIONS

- **Composition:** 94.1% a.i. Cerevisane® by Lesaffre et Compagnie
- **Formulation:** Wettable Powder
- **Application:** Foliar (preventive)
- **Suitability:** Organic & Conventional

HOW TO USE DURALEV

- For **preventive** foliar application, ideally in **early season** with continued application.
- **Replaces or complements** conventional fungicides. Can lower costs, resistance risk, and residues.
- Near-limitless **compatibility for tank mixes** and rotational programs. Suitable for foliar applications.
- Keeps schedules flexible—**rainfast in 2 hours**, 4-hour Restricted-Entry Interval (REI), and **no MRL restrictions** at harvest.

LOW RATE

0.23–0.91

lb/acre depending on crop & disease pressure

SPRAY VOLUME

10–100+

gal/acre depending on crop and canopy

RE-APPLICATION

7–14

days depending on disease pressure

CROPS

Berries	Hops
Brassicas	Leafy Vegetables
Bulbs	Legumes
Cereals	Oilseeds
Citrus	Peanuts
Cucurbits	Pome Fruit
Fruiting Vegetables	Roots & Tubers
Grapes	Stone Fruit
Hemp	Tree Nuts
Herbs	

DISEASES

Alternaria	Downy Mildew	Powdery Mildew
Anthracnose	Early Blight	Rust
Blast	Foliar Pathogens (fungal and bacterial)	Scab
Botrytis	Brown Rot	Sclerotinia
Brown Spot	Fusarium	Smut
Canker	Late Blight	Sour Rot
Cercospora	Melanose	White Mold
Colletotrichum	Phytophthora	

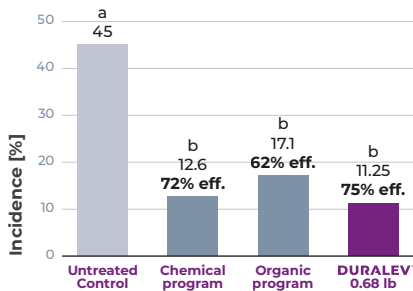

Please see the product label for complete details. California restrictions may apply.

Highlighted diseases mark where DURALEV performed exceptionally strong in trials.

COMBAT-PROVEN IN THE FIELD

Downy Mildew on Lettuce

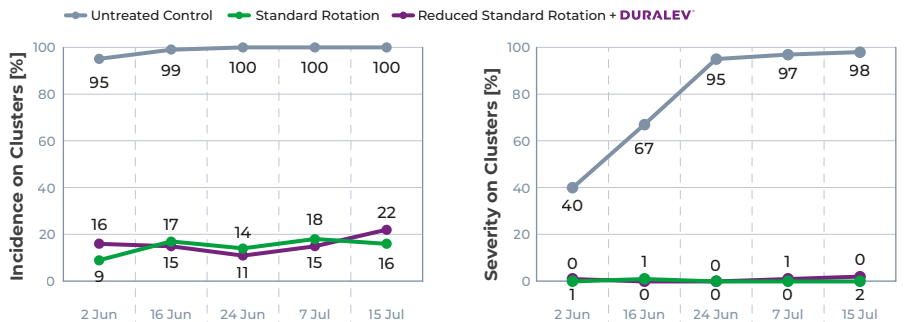

AZ (2018); Variety Romaine

DURALEV alone performed as well as both the chemical and organic program.

Powdery Mildew on Grapes

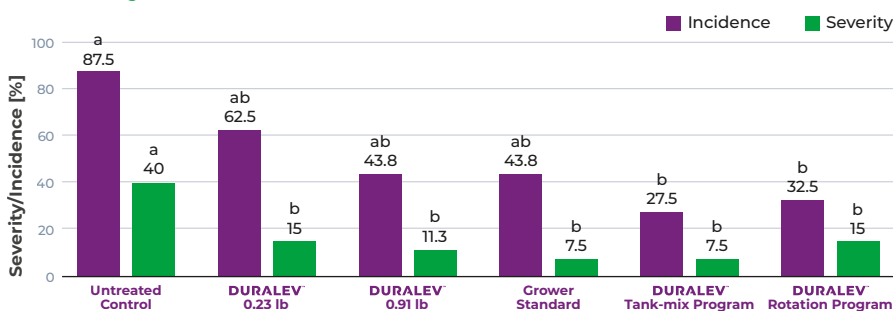

Hickman, CA (2020); Variety Chardonnay

“Standard rotation” and “Reduced Standard Rotation + DURALEV” deliver the same excellent disease control, **meaning you can reduce chemical products** to manage resistance, lower residues, and cut down PHI.

Powdery Mildew on Cherries

Ephrata, WA (2021)

DURALEV has strong efficacy alone, but even better when tank-mixed or rotated with conventional products.
